

T-3004 Service Information Letter
Service Information
P/N(s): EE350A37-1162-03

Revision: IR **Issued:** 10/2/2024

Subject:	New Part Number EE350A37-1126-03 Connect Compass with AS350, AS355 and EC130 installation eligibility and Airworthiness Limitations.
EXTEX Part Number:	EE350A37-1126-03
Installations:	Airbus Helicopters AS350B, AS350B1, AS350BA, AS350D, AS350B2, AS350B3, EC130B4, EC130T2, AS355E, AS355F, AS355F1, AS355F2, AS355N, AS355NP as listed on Supplement 81.
Revision History:	DECO 626: IR – 10/4/2024 Initial Release
Reason:	To inform customers/operators of a newly released part number, its installation eligibilities, and its Airworthiness Limitations.
Description:	Airbus 350A37-1126-03 has varying life tracking requirements based on model. Having a part with a life limit on one platform and not on another may lead to improper life tracking for operators with mixed fleets. EXTEX originally introduced part number E350A37-1126-03, which did not include EC130 eligibility. To add those models to the eligibility, the FAA required a new part number be assigned. That new P/N is EE350A37-1126-03. The design and manufacturing of EXTEX P/Ns E350A37-1126-03 and EE350A37-1126-03 are identical except for the part marking. New part number EE350A37-1126-03 is eligible for the listed AS350, AS355 and EC130 models. This part number has a 20,000 hour life limit on all eligible models. Airworthiness Limitations T-3003 applies to all models.
Applicability:	Eligible AS350, AS355 and EC130 models with EE350A37-1126-03 Connect Compass installed
Accomplishment Instructions:	Refer to T-3003 for Airworthiness Limitations
FAA Approval:	FAA Approval not required.
Notes:	Please contact your EXTEX representative with any questions.
